# We're not the cheapest

Like many things in business, the choices you make are often dictated by cost. But whilst on paper the lowest price might look more favourable, the reality is we're often the company called in to replace the previous cleaners who under-quoted and are under-delivering.

In our industry it's true that what you pay for is what you get; we don't quote to win the business, we quote to provide a service that delivers to your expectations, ensures a healthy environment for your staff and doesn't put our cleaners under unreasonable pressure.

We pride ourselves on being honest and transparent from the outset. We won't promise you the world, but we will promise to do what we say we will, go above and beyond when needed, and respect and value the commitment we've made to you. We're about being sustainable in both our promises and the services we provide.

## Lickable Surfaces

We take the cleaning products we use seriously. Using GECA (Good Environment Choice Australia) Certified, which for you and your staff means the absence of residual and airborne toxic substances left behind from chemicals other cleaning companies use to cut costs and corners.

As with anything negative it can compound over time, and you don't want that tipping point to impact your staff adversely.
